

Azure works with regions. In student subscriptions, we have access to 5 regions where we can create resources.
How can we find them?

Now, let's create resources for image analysis in Azure.
In the search bar, type "Computer Vision".

The screenshot shows the 'Create Computer Vision' form in the Microsoft Azure portal. The form is divided into sections: Basics, Network, Identity, Tags, and Review + create. The 'Basics' section is active, showing fields for Subscription, Resource group, Region, Name, and Pricing tier. A red box highlights the 'Name' field with the error message 'The value must not be empty.'

1. Subscription — select your Azure subscription here.

2. Resource Group — a resource group is a container used to organize related Azure resources together. Here, select "Create new" and enter a name for the new resource group.

3. Region — select one of the five regions available in your student subscription.

4. Name — enter a unique name for your resource.

5. Pricing Tier — the "Free" option will be enough for us.

6. Remember to select the checkbox before continuing.

Example of a completed form:

Boost content discoverability, accelerate text extraction, and create products that more people can use by embedding vision capabilities in your apps. Use visual data processing to label content (from objects to concepts), extract printed and handwritten text, recognize familiar subjects like brands and landmarks, and moderate content. No machine learning expertise is required.

The deployment process has finished successfully.

On the main page of the Azure portal, select "Computer Vision" again.

Here you can see the list of all available Computer Vision resources. Click on the name of your resource.

Here you can see all the information about your resource.
We will need the “Key” and the “Endpoint” later to connect our application with the Azure Computer Vision service.

The screenshot displays the Microsoft Azure portal interface. On the left, the navigation pane shows the 'Computer vision' service selected under 'More services'. The main content area is titled 'visionazr06202604 Computer vision'. It includes a search bar, a 'Delete' button, and a 'JSON View' link. The 'Overview' tab is active, showing essential information: Resource group (vision), Status (Active), Location (Sweden Central), Subscription ID (a6b1c7b6-23fe-4dd9-b054-2a16e78eb954), and Tags (Add tags). Below this, the 'Get started' section provides a link to 'Go to Vision Studio'. The 'Keys and endpoint' section contains a warning about key security and displays the following details:

Field	Value
KEY 1	
KEY 2	
Location/Region	swedencentral
Endpoint	https://visionazr06202604.cognitiveservices.azure.com/
